

SIDELINE – privacy screen

Create your privacy with a retractable side blind

The SIDELINE allows balconies, terraces and garden areas to enjoy not only protection from the sun and wind, but a high level of much needed privacy in busy urban areas.

The SIDELINE cassette was developed in a modern, neutral yet typical European design. Available in a wide variety of frame colours, the SIDELINE will compliment any external facade. High-quality and corrosion resistant materials and coatings make the SIDELINE a very durable product.

For your choice of fabric, Helioscreen's extensive external ranges HELIOSHADE 100, HELIO 86 and HELIO 93, provide a huge variety of designer colourways.

Mounting:

SIDELINE is adaptable for every living situation: e.g. the mounting support at the far end of the extension can either be mounted on the floor, wall, or by using a lawn mandrel or a concreted floor holder.

Discreet

The mounting brackets allow the cassette to rest on the mounting surface without any gap, thus concealing the mounting parts.

Secure lock

A child-proof lock avoids kickbacks or unwanted opening. Quality and safety come first.

Retraction aid

A caster is used as a retraction aid, reducing the effort for extending and retracting the awning.

Dimensions

Straight Unit: Maximum system height 2100 mm. Maximum projection 4000 mm

Sloped unit:

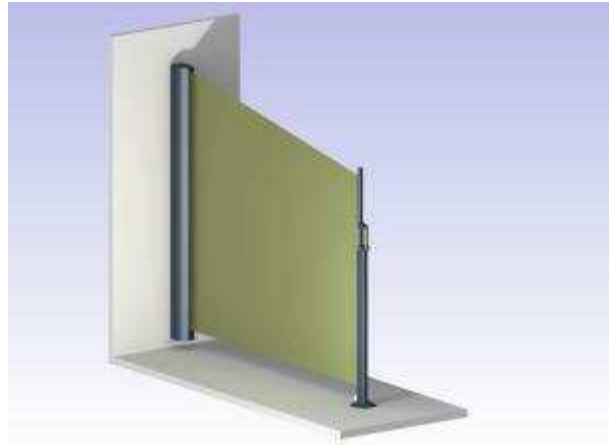

The sloped unit design is the optimal lateral addition to your folding arm awning.

Dimensions sloped unit:

Maximum system height 2500 mm

Maximum projection 4000 mm
